

	Quality and environmental policy of MECSEK-ÖKO Zrt.			
	ISO 9001:2000	ISO 14001:2004	2. edition	3. version

Quality and environmental policy:

MECSEK-ÖKO Environmental Private Incorporated Company has been working on closing of uranium ore mine in Mecsek and eliminating damages of environment and remediation of affected areas based on the Government Resolution No 2385/1997(XI26). Our tasks are the monitoring and maintaining activities of remediated and landscaped areas as well from 2009 onwards.

MECSEK-ÖKO Zrt as 100% State owned Company has been working on elimination of environmental damages caused by mining activity of Gyöngyösoroszi ore mine - since 2004.

We need to perform short and long term water treatment activities to protect water bases and surface water flows on our working areas and environment.

We keep the contamination level of the cleaned water far below the specified limit. Our goal is to extend our planning, implementation and authorisation processes to other locations as well.

Our know-how, experience and possession of the knowledge of relevant law regulations makes our company -as accentuated supplier - proper to execute complex and high value environmental projects including damage surveys, planning and execution of remediation and landscaping, monitoring and maintaining activities on private and state owned contaminated areas.

During achieving our goals and execution of our tasks we take effort to be cost and energy efficient and avoid any stress of our environment on environmentally aware and managed way.

According to our possibilities we use renewable and green energy, and decrease the load of our environment by continuously improving our machines during our work.

To react to the new challenges one of our answers was the execution of the yearly new training plan.

MECSEK-ÖKO Zrt has implemented and operated new integrated Quality and Environmental Management System to keep our Customer satisfied and extend our market. The whole management team and employees are committed to keep the system operated.

The goal and commitment of all of our employees is to use the toolset of ISO 9001:2000, ISO14001:2004 systems during his/her daily routine, continuously improving the quality of the labour and fulfill the needs of the Customer at as high level as possible. Our common goal is to make our Company proper and capable for the new challenges.

	Quality and environmental policy of MECSEK-ÖKO Zrt.			
	ISO 9001:2000	ISO 14001:2004	2. edition	3. version

Our Company prepares Action Plan for new tasks, yearly agendas are defined in Technical Factory Plan. Business Plan includes the goals, technical tasks and necessary financial and economic strategy.

We expect to possess the same environmentally aware management approach from our supplier and subcontractor as we have hence it is a key point of our valid contract with them.

During the management review we supervise our quality and environmental policy and based on that we set our new goals up.
